

Taiwan Stock Exchange Corporation

Press Release

2024/11/22

Corporate Communications Department

Taiwan Stock Exchange Partners with Taiwan Carbon Exchange for the 2024 WFE “Ring the Bell for Climate” Initiative, Promoting Carbon Neutral Certification and National Carbon Credit Exchange Platform

In alignment with the World Federation of Exchanges (WFE) 2024 “Ring the Bell for Climate” initiative and Taiwan's 2050 net-zero vision, the Taiwan Stock Exchange (TWSE) is stepping up its commitment to sustainable finance education. From November 18 to 22, TWSE participated in the launch of the ISO 14067 and 14068-1 courses organized by the Taiwan Carbon Exchange. These programs aimed to cultivate carbon management professionals and connect Taiwan to international carbon standards. This initiative strengthens Taiwan’s role in global decarbonization efforts.

Further supporting corporate carbon reduction, TWSE participated in the inauguration of Taiwan’s National Carbon Credit Exchange Platform on October 21, where Chairman Sherman Lin reiterated Taiwan’s dedication to green economic transformation. By providing a transparent and secure trading platform, TWSE encourages corporations to pursue emissions reduction, driving Taiwan’s progress toward net-zero.

As a WFE member, TWSE is proud to join this year’s “Ring the Bell for Climate” initiative in response to the UN COP29. TWSE is committed to increasing corporate sustainability disclosures, promoting green financial products, and actively involving corporations in carbon neutrality projects. Through fair and transparent trading, TWSE supports broader corporate engagement in low-carbon transitions, contributing to Taiwan’s 2050 net-zero goal.

TWSE joined the WFE 2024 “Ring the Bell for Climate” campaign in honor of United Nations Climate Change Conference (COP29)—the inauguration of Taiwan’s National Carbon Credit Exchange Platform.

TWSE participated in the launch of the 「Greenhouse Gases-Carbon footprint of products Verification Lead Verifier Training Course (ISO 14067:2018)」 and 「Carbon neutrality Lead Training Course (ISO 14068-1:2023)」 organized by the Taiwan Carbon Exchange.
